

Simply Elegant Interior Doors

About Us

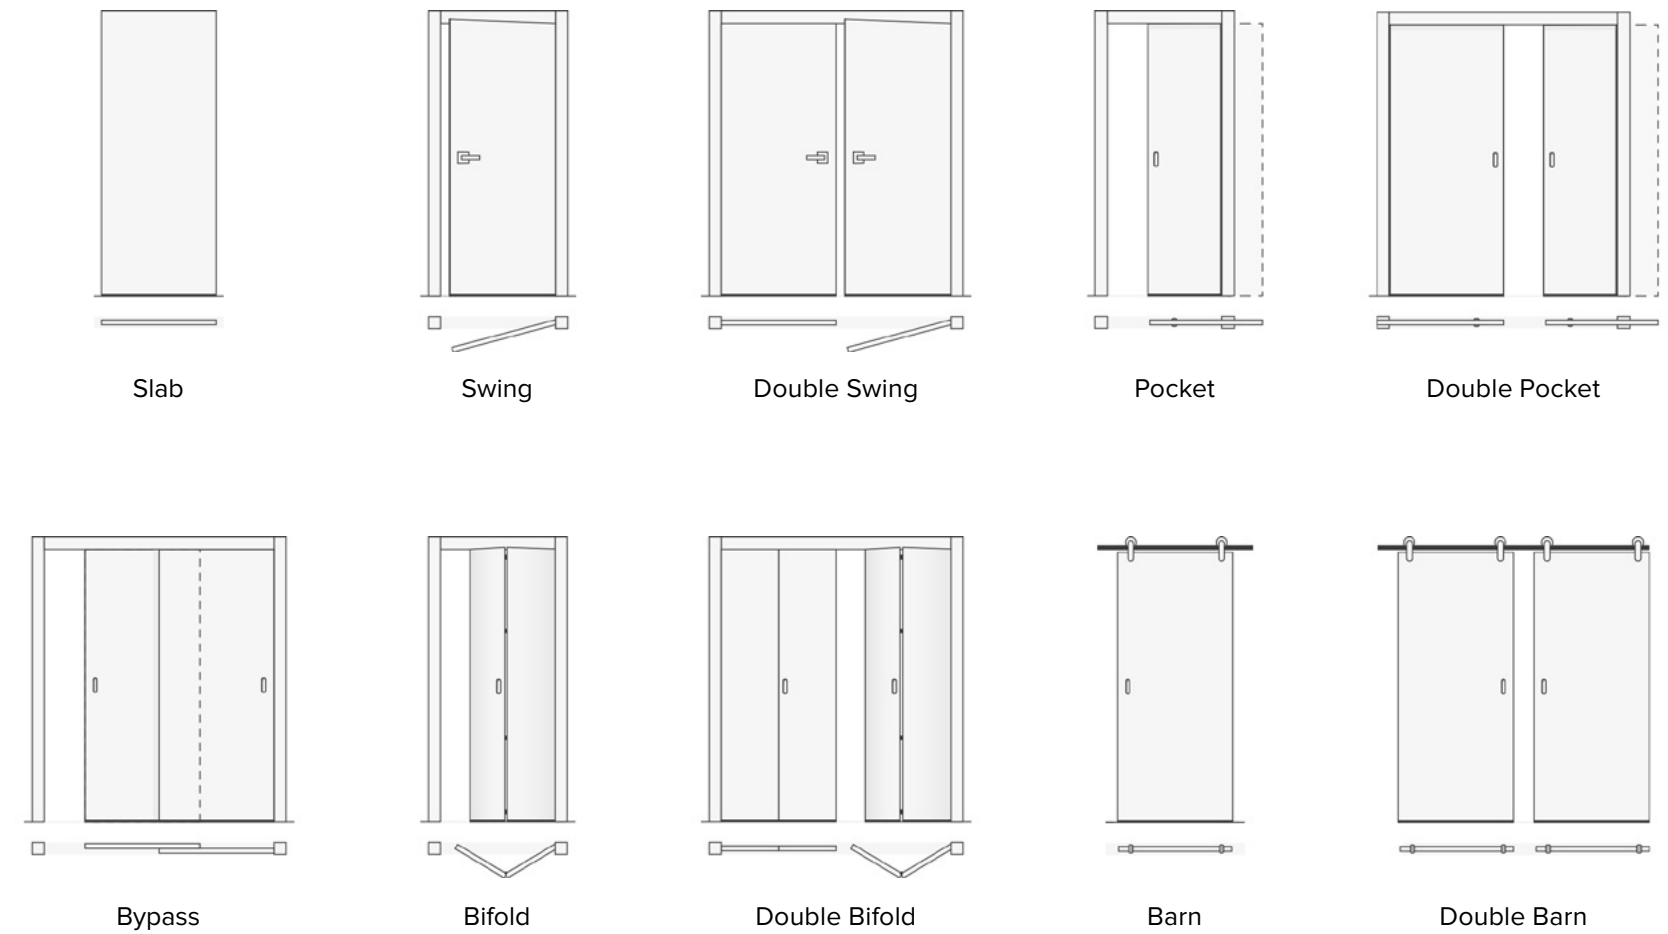

We are an innovative company that takes customer satisfaction to the next level. Our online app is so easy to work with, there is no learning curve. It includes step-by-step instructions of how to put your door together and place the order – in minutes. There is no hassle, no travel time, no contracts to sign, no harried workers and managers to deal with. Pick a model from our catalog, configure it any way you like, choose a finish, and hit the send button: that's it. Your order will soon be delivered – to your home or construction site. You are important to us.

WE ARE WORLDWIDE

Door Types

Looking for doors that won't take up a lot of space? Or, to make the interior of your home more interesting, you need a door that will look kind of special? Maybe you would like to zone your room space with a door? In order to solve any of your problems, Almes Doors offers a wide range of the door opening types. Almost any slab in the catalog can be made in one of these specifications.

Interior Door Collection

Modern Style

The Modern Style doors collection offered by Almes Doors combines simplicity of form with state-of-the-art functionality. With their elegantly understated look and top-of-the-line materials, these doors can play a harmonizing role in interior design, balancing out the rest of the décor and accentuating the owner's style preferences.

Interior Door Collection

Classic Style

The word “classic” denotes timeless quality; something that never gets old. Certain design are destined to pass the test of time. They transcend epochs and fads with enviable ease. Classic can two centuries. The three architectural orders most readily recognizable by the type of column they employ go back to ancient Greece. A classic design captures everyting that was good and attractive about the era it comes from while eschewing the superfluous. Here, each classic door model bears unmistakable signs of the epouch by which it was inspired, with distinct Renaissance, Batoque, Classicism, or Art Nouveau features, with French, Italian, British, or Colonial overtones.

Concealed Doors

New Product

Concealed doors have a high level of strength and stiffness and high level of soundproofing. They are resistant to high humidity, temperature resistant to changes in temperature and to door leaf shrinkage.

Constructive structure consists of: sandwich panel (MDF, a bar of pine), located inside the door leaf between two MDF panels (6 mm), cavities in the door of such a design with foam.

The leaf can have a different decor on each side of the door. The set of Invisible frame and leaf is equipped with Concealed hinges from Italian production.
