About Us

We are an innovative company that takes customer satisfaction to the next level. Our online app is so easy to work with, there is no learning curve. It includes step-by-step instructions of how to put your door together and place the order – in minutes. There is no hassle, no travel time, no contracts to sign, no harried workers and managers to deal with. Pick a model from our catalog, configure it any way you like, choose a finish, and hit the send button: that's it. Your order will soon be delivered – to your home or construction site. You are important to us.

Details

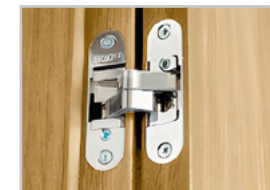

Solid 35 mm or 22 mm thick rail

CPL surface or PREMIUM laminate which is both good-looking and durable

Solid dowel joint

Three concealed hinges set, available in silver, black and gold colors.

Aesthetic frameless tongue-and-groove glazing without bars

RUMBA handle with antibacterial coating containing active silver ions (optional)

Free factory through hole drilling for handles (split handles) if ordered together with the leaf

MDF stile for the CPL laminates with the AntiFinger coating

Glulam wood stile for the PREMIUM and CPL laminates without the AntiFinger coating

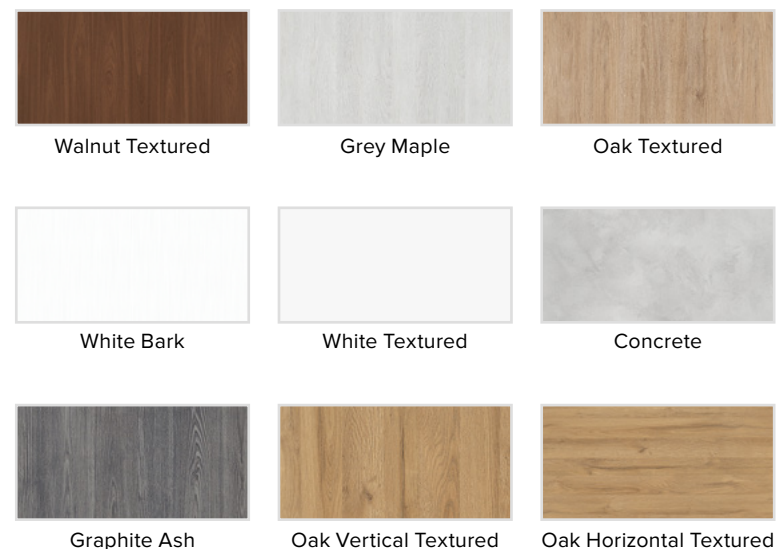

Modern tempered and frosted or optionally: transparent and novel VSG glass: mat or black

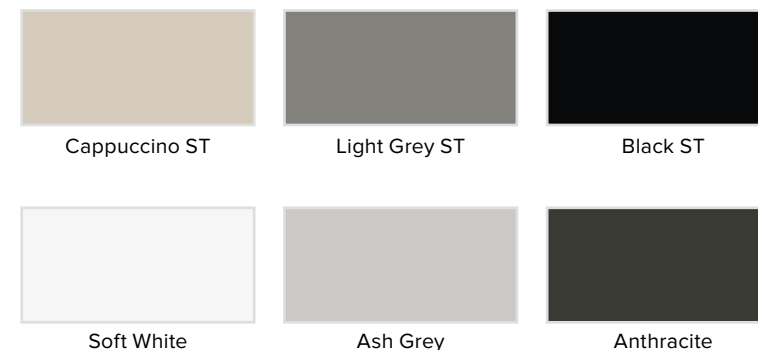

Wood Veneer

Wood Texture Overlay PP

High Endurance Covering (CPL)

UV Painted

Wood Veneer

The wood used to make veneers differs in terms of colour, texture and consistency. Even a single tree may feature significant differences in this respect. These are the characteristic features of natural wood and may not be claimed.

The presented colours are for illustrative purposes only and should not be used as colour samples

Wood Texture Overlay PP

The Premium laminate is a product based on Polypropylene (PP), a material of very high resistance to abrasion and scratching, plus top quality appearance. It adds a refined looks and individual character to the doors, as it imitates natural wood perfectly. Not only does the Premium laminate attracts with its appearance but with its functionality, as it resists scratching better than average products and is fire-retardant and abrasion resistant. These properties ensure the extended longevity and maintenance-free use of the PREMIUM range products even in mostadverse conditions.

High Endurance Covering (CPL)

The CPL laminate is composed of a decorative layer impregnated in resins, and a base layer ensuring flexibility. Following the lamination process, the top resin layer is hardened for high resistance to scratching and abrasion. It is characterised by high resistance to impact, abrasion, scratching, heat and UV radiation Thanks to using this type of material, the door can be installed in so-called “difficult” interiors [exposed to heat, moisture or extraordinary use].

UV Painted

The door surface has several coats of the WHITE TITANIUM UV modern UV hardened varnish. The flat surfaces are covered with a specialist base membrane in the first phase, and then coated twice with a top quality paint and hardened with UV. The moulded surfaces can not be covered with the membrane for technological reasons, so they are coated with three paint layers and hardened with UV. The fully automatic coating process follows scanning to ensure ideal quality of the surface. Hardening the paint with the cutting-edge method involving UV light source ensures very high mechanical resistance.
